Broken Hill High School Assessment Policy Years 7 to 10

Rationale

Assessment is the ongoing process of gathering information about student achievement in relation to predetermined objectives and outcomes. Each faculty will use this information to:

- determine the extent to which the student has achieved the objectives and the outcomes of the course
- provide feedback to the students so that they may improve their performance
- provide information to parents about the progress of their child
- assist in the evaluation of teaching programs and methods.

Student assessment is:

- a continuous process
- reflective of the school assessment policy
- based on reliable and valid information
- clearly related to and providing information about one or more course outcomes
- varied to give all students the opportunity to demonstrate achievement
- presented in a way that furthers student development and learning.

When Formal Assessment Tasks are given, the following procedures will apply:

- the task will have a school assessment task cover sheet
- all students will receive an assessment schedule/overview for all subjects outlining assessment tasks at the beginning of the year. The Assessment Schedule/Overview will include:
 - the type of task (exam, portfolio, research task, performance project etc.)
 - weighting of the task (no task will be worth less than 10%)
 - approximate due date of the task (week 5 term 2 etc.) NB: an exact due date will be given when the task is handed out.

Procedural fairness

To ensure all students receive fair treatment, the following must be adhered to:

- A minimum of two weeks notification be given of the due date.
- The classroom teacher marks on the roll that the students have received and submitted tasks.
- Class teachers to provide a comprehensive explanation of the task when distributing the task and support to students as they attempt the task.
- Each task to contain specific information on mark allocation (i.e., marking scale) check marking to occur.
- If a common yearly exam is set, then there will be input from all teachers of the year group.

Late submissions

The following procedures relate to all students:

- Assessment tasks not submitted by the due date in Years 9 and 10 will be awarded **zero**.
- Assessment tasks not submitted by the due date in Years 7 and 8 will cause the following deduction of marks to occur:
 - One day late: A deduction of **25%** of their total mark.
 - Two days late: A deduction of **50%** of their total mark.
 - Three days late: A mark of **zero** will be awarded.
- Student work considered to be a non-serious attempt will be awarded zero. Students will be required to re-submit work.
- A student will receive a report descriptor for any work that is late. However, they will not receive a mark towards their formal assessment. Students must still hand in the task so that syllabus outcomes can be reported on.
- If there is a computer/printing problem and a task is late then the student must produce their handwritten notes and research as proof of work being undertaken. If notes etc. are not submitted, then the above points will apply. If using a computer, a back-up copy should be able to be produced.

Student ill/sick on the day a task is due

If a student is ill/sick on the day the task is due then a written note from home stating that fact must be handed in with the task. The task must be handed in the day the student returns to school from illness **not** the next lesson that they have that class (If this occurs then the student **will** receive zero). The reason for this is that they were at school and failed to submit the task. They will receive a descriptor for their report outcome. Students must complete and illness/misadventure form (shown below).

Broken Hill High School
Years 7- 10 Illness/Misadventure Form

To be completed when an assessment task is missed.

Students absent from exam

If students are absent from exams, they must contact their Head Teacher on their first day back. An arrangement will be made to complete the exam at the earliest possible time. If they fail to do so they may be awarded zero. Student must complete an illness/misadventure form (shown below).

The form is titled "Broken Hill High School Years 7-10 Illness/Misadventure Form" and includes a school crest. It is intended to be completed when an assessment task is missed. The form contains several sections for student and parental information, including fields for name, year, class, date of absence, task details, and reasons for absence. It also has designated areas for parental and student signatures, as well as a section for the head teacher's signature and the final decision/outcome.

Procedures if a Formal Assessment Task is not submitted – Years 7 and 8

- a) Official faculty warning letter sent to parent.
- b) Phone call home to parent from classroom teacher to discuss failure to submit task.

Procedures if a Formal Assessment Task is not submitted – Years 9 and 10

- a) First official New South Wales Education Standards Authority (NESA) warning letter indicating failure to submit task.
- b) Phone call home to parent from classroom teacher to discuss failure to submit task.
- c) Second official NESA warning letter indicating failure to submit task if the task has still not been handed in.

Note: For a Formal Assessment Task no faculty warning letter will be issued before the NESA letter to indicate failure to submit the task. This process can recommence at any point if a student fails to submit a series of assessment tasks.

Procedures for the incompleteness of Informal Tasks (e.g., homework, class work) – Years 7 and 8

- a) A faculty letter should be sent to indicate to parents that the task is not completed.
- b) Phone home to inform parents of seriousness of incompleteness of tasks.
- c) If the task is still not submitted, then a second faculty letter is to be sent home.

Procedures for the incompleteness of Informal Tasks (e.g., homework, class work) - Years 9 and 10

The processes explained above, in relation to non-submission of formal assessment tasks, can also be undertaken if a student is not applying themselves with **due diligence and sustained effort** to all aspects of the course including class work and homework and if a student has long term or regular absences from school.

A student will be considered to have satisfactorily completed a course if there is sufficient evidence that the student has:

- a) **Followed** the course developed or endorsed by the Boards of Studies.
- b) **Applied** themselves with diligence and sustained effort to the set tasks and experiences provided in the course by the schools.
- c) **Achieved** some or all the course outcomes.

What is meant by 'Unfair Advantage'/'Malpractice' in examinations/Assessment Tasks?

Every effort is made to ensure all students have the same advantage. To guarantee this, students sitting any examination or completing any task must follow procedures and rules to stop any unfair advantage. The following information applies in all exams:

Exam Information

Exams include major school exams and class tests/assessment tasks:

- Students may not borrow any equipment from any person during an examination.
- No student may communicate or attempt to communicate with any other person, except the supervising teachers, during an examination.
- A 3-strike penalty system applies in the exam hall. Students may receive loss of marks or a zero for their exam if they continue to display poor behaviour in the exam.
- If you wish to ask a question during an examination, please raise your hand and a teacher will come to you. Do not leave your seat.
- Action will be taken against any student who disrupts or attempts to disrupt any part of any examination in any way.
- Mobile phones are not to be brought to examinations.

The above rules apply from the time the student enters the exam room until all papers are handed in and the student has been formally dismissed.

What is meant by 'Unfair Advantage'/'Malpractice' in assessment tasks?

If a student has been found to have gained an unfair advantage by:

- a) Plagiarism.
- b) Gaining help from another student/s or person.
- c) Submitting work of others as their own.

Or for any reasons contained in the exam information, a **zero '0' mark will be awarded**.

Report Performance Descriptors

The General Performance Descriptors

The General Performance Descriptors were developed by the NESA Syllabus Committees to develop specific performance descriptors for each subject. These Course Performance Descriptors are based on the knowledge and skills objectives of courses and will assist schools in awarding grades in all subjects.

Grade	General Performance Descriptors
A	The student has an extensive knowledge and understanding of the content and can readily apply this knowledge. In addition, the student has achieved a very high level of competence in the processes and skills and can apply these skills to new situations.
B	The student has a thorough knowledge and understanding of the content and a high level of competence in the processes and skills. In addition, the student can apply this knowledge and these skills to most situations.
C	The student has a sound knowledge and understanding of the main areas of content and has achieved an adequate level of competence in the processes and skills.
D	The student has a basic knowledge and understanding of the content and has achieved a limited level of competence in these processes and skills.
E	The student has an elementary knowledge and understanding in a few areas of the content and has achieved very limited competence in some of the processes and skills.

English Outcomes

- EN5-1A** Responds to and composes increasingly sophisticated and sustained texts for understanding, interpretation, critical analysis, imaginative expression and pleasure.
- EN5-2A** Effectively uses and critically assesses a wide range of processes, skills, strategies and knowledge for responding to and composing a wide range of texts in different media and technologies.
- EN5-3B** Selects and uses language forms, features and structures of texts appropriate to a range of purposes, audiences and contexts, describing and explaining their effects on meaning.
- EN5-4B** Effectively transfers knowledge, skills and understanding of language concepts into new and different contexts.
- EN5-5C** Thinks imaginatively, creatively, interpretively and critically about information and increasingly complex ideas and arguments to respond to and compose texts in a range of contexts.
- EN5-6C** Investigates the relationships between and among texts.
- EN5-7D** Understands and evaluates the diverse ways texts can represent personal and public worlds.
- EN5-8D** Questions, challenges and evaluates cultural assumptions in texts and their effects on meaning.
- EN5-9E** Purposefully reflects on, assesses and adapts their individual and collaborative skills with increasing independence and effectiveness.

English Life Skills Outcomes

- ENLS-1A** Listens and responds in familiar contexts.
- ENLS-2A** Communicates for a variety of purposes, audiences and contexts.
- ENLS-3A** Selects and uses language to communicate according to purpose, audience and context.
- ENLS-4A** Views and responds to a range of visual texts, media and multimedia.
- ENLS-5A** Recognises and uses visual texts, media and multimedia for a variety of purposes, audiences and contexts.
- ENLS-6A** Reads and responds to a range of written texts in familiar contexts.
- ENLS-7A** Uses strategies to obtain meaning from and interpret a range of texts.
- ENLS-8A** Writes short texts for everyday purposes.
- ENLS-9A** Composes texts for a variety of purposes and audiences.
- ENLS-10B** Explores the ways in which language forms, features and structures of texts vary according to purpose, audience and context.
- ENLS-11B** Composes, publishes and presents texts appropriate to purpose and audience in a range of contexts.
- ENLS-12C** Responds to texts in ways that are imaginative and interpretive.
- ENLS-13C** Engages critically with texts using personal experiences.
- ENLS-14D** Explores how the use of language affects personal roles and relationships with others.
- ENLS-15D** Responds to and composes texts that explore personal, social and world issues.
- ENLS-16D** Explores the ways cultural ideas and perspectives shape a range of spoken, written, visual and multimedia texts.
- ENLS-17E** Uses individual and collaborative skills in the learning process.

Mathematics (5.1) Outcomes

MA4-5NA	Operates with fractions, decimals and percentages.
MA4-6NA	Solves financial problems involving purchasing goods.
MA4-7NA	Operates with ratios and rates, and explores their graphical representation.
MA4-8NA	Generalises number properties to operate with algebraic expressions.
MA4-12MG	Calculates the perimeters of plane shapes and the circumferences of circles.
MA4-17MG	Classifies, describes and uses the properties of triangles and quadrilaterals, and determines congruent triangles to find unknown side lengths and angles.
MA4-18MG	Identifies and uses angle relationships, including those related to transversals on sets of parallel lines.
MA4-20SP	Analyses single sets of data using measures of location, and range.
MA5.1-1WM	Uses appropriate terminology, diagrams and symbols in mathematical contexts.
MA5.1-2WM	Selects and uses appropriate strategies to solve problems.
MA5.1-3WM	Provides reasoning to support conclusions that are appropriate to the context.
MA5.1-4NA	Solves financial problems involving earning, spending and investing money.
MA5.1-5NA	Operates with algebraic expressions involving positive-integer and zero indices, and establishes the meaning of negative indices for numerical bases.
MA5.1-6NA	Determines the midpoint, gradient and length of an interval, and graphs linear relationships.
MA5.1-7NA	Graphs simple non-linear relationships.
MA5.1-8MG	Calculates the areas of composite shapes, and the surface areas of rectangular and triangular prisms.
MA5.1-9MG	Interprets very small and very large units of measurement, uses scientific notation, and rounds to significant figures.
MA5.1-10MG	Applies trigonometry, given diagrams, to solve problems, including problems involving angles of elevation and depression.
MA5.1-11MG	Describes and applies the properties of similar figures and scale drawings.
MA5.1-12SP	Uses statistical displays to compare sets of data, and evaluates statistical claims made in the media.
MA5.1-13SP	Calculates relative frequencies to estimate probabilities of simple and compound events.

Science Outcomes

- SC5-4WS** Develops questions or hypotheses to be investigated scientifically.
- SC5-5WS** Produces a plan to investigate identified questions, hypotheses or problems, individually and collaboratively.
- SC5-6WS** Undertakes first-hand investigations to collect valid and reliable data and information, individually and collaboratively.
- SC5-7WS** Processes, analyses and evaluates data from first-hand investigations and secondary sources to develop evidence-based arguments and conclusions.
- SC5-8WS** Applies scientific understanding and critical thinking skills to suggest possible solutions to identified problems.
- SC5-9WS** Presents science ideas and evidence for a particular purpose and to a specific audience, using appropriate scientific language, conventions and representations.
- SC5-10PW** Applies models, theories and laws to explain situations involving energy, force and motion.
- SC5-11PW** Explains how scientific understanding about energy conservation, transfers and transformations is applied in systems.
- SC5-12ES** Describes changing ideas about the structure of the Earth and the universe to illustrate how models, theories and laws are refined over time by the scientific community.
- SC5-13ES** Explains how scientific knowledge about global patterns of geological activity and interactions involving global systems can be used to inform decisions related to contemporary issues.
- SC5-14LW** Analyses interactions between components and processes within biological systems.
- SC5-15LW** Explains how biological understanding has advanced through scientific discoveries, technological developments and the needs of society.
- SC5-16CW** Explains how models, theories and laws about matter have been refined as new scientific evidence becomes available.
- SC5-17CW** Discusses the importance of chemical reactions in the production of a range of substances, and the influence of society on the development of new materials.
