2024

Effective: *Term 1, 2024*
Review Date: *Term 4, 2024*

Broken Hill High School Assessment Policy Years 7 to 10

Rationale

Assessment is the ongoing process of gathering information about student achievement in relation to predetermined objectives and outcomes. Each faculty will use this information to:

- determine the extent to which the student has achieved the objectives and the outcomes of the course
- provide feedback to the students so that they may improve their performance
- provide information to parents about the progress of their child
- assist in the evaluation of teaching programs and methods.

Student assessment is:

- a continuous process
- reflective of the school assessment policy
- based on reliable and valid information
- clearly related to and providing information about one or more course outcomes
- varied to give all students the opportunity to demonstrate achievement
- presented in a way that furthers student development and learning.

When Formal Assessment Tasks are given, the following procedures will apply:

- the task will have a school assessment task cover sheet
- all students will receive an assessment schedule/overview for all subjects outlining assessment tasks at the beginning of the year. The Assessment Schedule/Overview will include:
  - the type of task (exam, portfolio, research task, performance project etc.)
  - weighting of the task (no task will be worth less than 10%)
  - approximate due date of the task (week 5 term 2 etc.) NB: an exact due date will be given when the task is handed out.

Procedural fairness

To ensure all students receive fair treatment, the following must be adhered to:

- A minimum of two weeks notification be given of the due date.
- The classroom teacher marks on the roll that the students have received and submitted tasks.
- Class teachers to provide a comprehensive explanation of the task when distributing the task and support to students as they attempt the task.
- Each task to contain specific information on mark allocation (i.e., marking scale) check marking to occur.
- If a common yearly exam is set, then there will be input from all teachers of the year group.
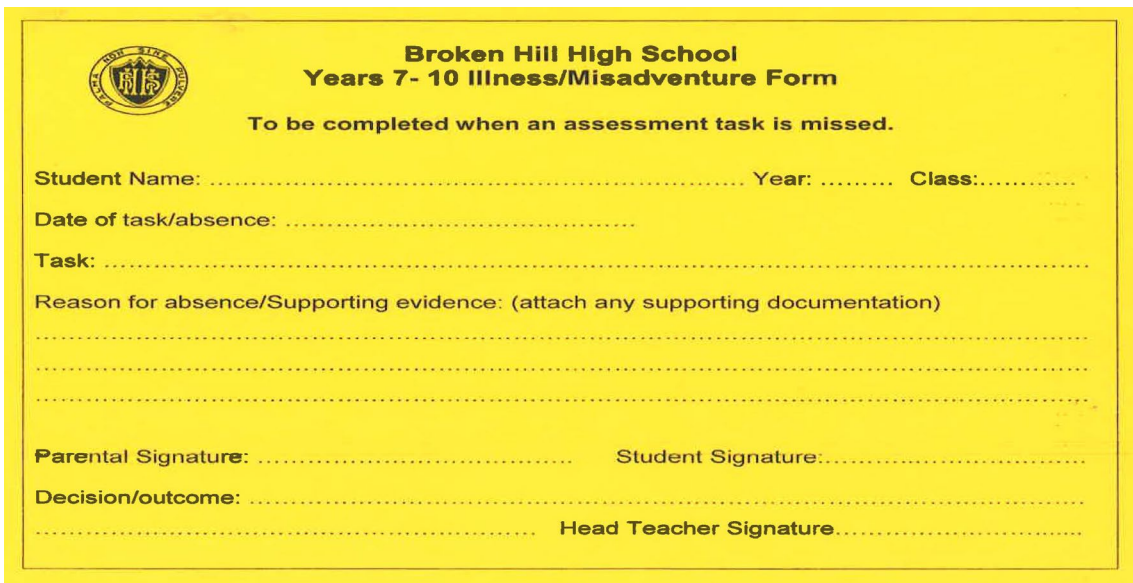

Late submissions

The following procedures relate to all students:

- Assessment tasks not submitted by the due date in Years 9 and 10 will be awarded **zero**.
- Assessment tasks not submitted by the due date in Years 7 and 8 will cause the following deduction of marks to occur:
  - *One day late:* A deduction of **25%** of their total mark.
  - *Two days late:* A deduction of **50%** of their total mark.
  - *Three days late:* A mark of **zero** will be awarded.
- Student work considered to be a non-serious attempt will be awarded zero. Students will be required to re-submit work.
- A student will receive a report descriptor for any work that is late. However, they will not receive a mark towards their formal assessment. Students must still hand in the task so that syllabus outcomes can be reported on.
- If there is a computer/printing problem and a task is late then the student must produce their handwritten notes and research as proof of work being undertaken. If notes etc. are not submitted, then the above points will apply. If using a computer, a back-up copy should be able to be produced.

## Student ill/sick on the day a task is due

If a student is ill/sick on the day the task is due then a written note from home stating that fact must be handed in with the task. The task must be handed in the day the student returns to school from illness _**not**_ the next lesson that they have that class (If this occurs then the student _**will**_ receive zero). The reason for this is that they were at school and failed to submit the task. They will receive a descriptor for their report outcome. Students must complete and illness/misadventure form (shown below).

Broken Hill High School
Years 7- 10 Illness/Misadventure Form

To be completed when an assessment task is missed.

Student Name: .... Year: .... Class:............

Date of task/absence: ....

Task: ....

Reason for absence/Supporting evidence: (attach any supporting documentation)

....
....
....

Parental Signature: .... Student Signature:...........................

Decision/outcome: ....
.... Head Teacher Signature............................

Students absent from exam

If students are absent from exams, they must contact their Head Teacher on their first day back. An arrangement will be made to complete the exam at the earliest possible time. If they fail to do so they may be awarded zero. Student must complete an illness/misadventure form (shown below).

Procedures if a Formal Assessment Task is not submitted – Years 7 and 8

a) Official faculty warning letter sent to parent.
b) Phone call home to parent from classroom teacher to discuss failure to submit task.

Procedures if a Formal Assessment Task is not submitted – Years 9 and 10

a) First official New South Wales Education Standards Authority (NESA) warning letter indicating failure to submit task.
b) Phone call home to parent from classroom teacher to discuss failure to submit task.
c) Second official NESA warning letter indicating failure to submit task if the task has still not been handed in.

Note: For a Formal Assessment Task no faculty warning letter will be issued before the NESA letter to indicate failure to submit the task. This process can recommence at any point if a student fails to submit a series of assessment tasks.

Procedures for the incompletion of Informal Tasks (e.g., homework, class work) – Years 7 and 8

a) A faculty letter should be sent to indicate to parents that the task is not completed.
b) Phone home to inform parents of seriousness of incompletion of tasks.
c) If the task is still not submitted, then a second faculty letter is to be sent home.

Procedures for the incompletion of Informal Tasks (e.g., homework, class work) - Years 9 and 10

The processes explained above, in relation to non-submission of formal assessment tasks, can also be undertaken if a student is not applying themselves with **due diligence and sustained effort** to all aspects of the course including class work and homework and if a student has long term or regular absences from school.

A student will be considered to have satisfactorily completed a course if there is sufficient evidence that the student has:
   a) **Followed** the course developed or endorsed by the Boards of Studies.
   b) **Applied** themselves with diligence and sustained effort to the set tasks and experiences provided in the course by the schools.
   c) **Achieved** some or all the course outcomes.

What is meant by 'Unfair Advantage'/'Malpractice' in examinations/Assessment Tasks?

Every effort is made to ensure all students have the same advantage. To guarantee this, students sitting any examination or completing any task must follow procedures and rules to stop any unfair advantage. The following information applies in all exams:

Exam Information

Exams include major school exams and class tests/assessment tasks:

- Students may not borrow any equipment from any person during an examination.
- No student may communicate or attempt to communicate with any other person, except the supervising teachers, during an examination.
- A 3-strike penalty system applies in the exam hall. Students may receive loss of marks or a zero for their exam if they continue to display poor behaviour in the exam.
- If you wish to ask a question during an examination, please raise your hand and a teacher will come to you. Do not leave your seat.
- Action will be taken against any student who disrupts or attempts to disrupt any part of any examination in any way.
- Mobile phones are not to be brought to examinations.

The above rules apply from the time the student enters the exam room until all papers are handed in and the student has been formally dismissed.

What is meant by 'Unfair Advantage'/'Malpractice' in assessment tasks?

If a student has been found to have gained an unfair advantage by:
   a) Plagiarism.
   b) Gaining help from another student/s or person.
   c) Submitting work of others as their own.

Or for any reasons contained in the exam information, a ***zero '0' mark will be awarded***.

Report Performance Descriptors

The General Performance Descriptors

The General Performance Descriptors were developed by the NESA Syllabus Committees to develop specific performance descriptors for each subject. These Course Performance Descriptors are based on the knowledge and skills objectives of courses and will assist schools in awarding grades in all subjects.

Grade	General Performance Descriptors
A	The student has an extensive knowledge and understanding of the content and can readily apply this knowledge. In addition, the student has achieved a very high level of competence in the processes and skills and can apply these skills to new situations.
B	The student has a thorough knowledge and understanding of the content and a high level of competence in the processes and skills. In addition, the student can apply this knowledge and these skills to most situations.
C	The student has a sound knowledge and understanding of the main areas of content and has achieved and adequate level of competence in the processes and skills.
D	The student has a basic knowledge and understanding of the content and has achieved a limited level of competence in these processes and skills
E	The student has an elementary knowledge and understanding in a few areas of the content and has achieved very limited competence in some of the processes and skills.

English Outcomes

EN5-RVL-01	Uses a range of personal, creative and critical strategies to interpret complex texts.
EN5-URA-01	Analyses how meaning is created through the use and interpretation of increasingly complex language forms, features and structures.
EN5-URB-01	Evaluates how texts represent ideas and experiences, and how they can affirm or challenge values and attitudes.
EN5-URC-01	Investigates and explains ways of valuing texts and the relationships between them.
EN5-ECA-01	Crafts personal, creative and critical texts for a range of audiences by experimenting with and controlling language forms and features to shape meaning.

English Life Skills Outcomes

EN5-ECB-01	Uses processes of planning, monitoring, revising and reflecting to purposefully develop and refine composition of texts.
ENLS-COM-01	Communicates in familiar or unfamiliar contexts.
ENLS-RVL-01	Engages with a range of texts.
ENLS-RVL-02	Uses reading strategies when engaging with a range of texts.
ENLS-URA-01	Identifies language and/or visual forms, features and structures.
ENLS-URB-01	Identifies ideas, experiences and values in a range of texts.
ENLS-URC-01	Makes connections with and between texts.
ENLS-ECA-01	Composes texts for everyday purposes.
ENLS-ECA-02	Composes texts using language conventions for specific purposes and audiences.
ENLS-ECB-01	Uses processes of planning and revising to develop texts.

Mathematics Advanced Outcomes

MA5-RAT-P-01	Identifies and solves problems involving direct and inverse variation and their graphical representations.
MA5-RAT-P-02	Analyses and constructs graphs relating to rates of change.
MA5-ALG-C-01	Simplifies algebraic fractions with numerical denominators and expands algebraic expressions.
MA5-ALG-P-01	Simplifies algebraic fractions involving indices, and expands and factorises algebraic expressions.
MA5-ALG-P-02	Selects and applies appropriate algebraic techniques to operate with algebraic fractions, and expands, factorises and simplifies algebraic expressions.
MA5-IND-C-01	Simplifies algebraic expressions involving positive-integer and zero indices, and establishes the meaning of negative indices for numerical bases.
MA5-IND-P-01	Applies the index laws to operate with algebraic expressions involving negative-integer indices.
MA5-IND-P-02	Describes and performs operations with surds and fractional indices.
MA5-EQU-C-01	Solves linear equations of up to 3 steps, limited to one algebraic fraction.
MA5-EQU-P-01	Solves monic quadratic equations, linear inequalities and cubic equations of the form $ax3 = k$.
MA5-EQU-P-02	Solves linear equations of more than 3 steps, monic and non-monic quadratic equations, and linear simultaneous equations.
MA5-LIN-C-01	Determines the midpoint, gradient and length of an interval, and graphs linear relationships, with and without digital tools.
MA5-LIN-C-02	Graphs and interprets linear relationships using the gradient/slope-intercept form.
MA5-LIN-P-01	Describes and applies transformations, the midpoint, gradient/slope and distance formulas, and equations of lines to solve problems.
MA5-TRG-C-01	Applies trigonometric ratios to solve right-angled triangle problems.
MA5-TRG-C-02	Applies trigonometry to solve problems, including bearings and angles of elevation and depression.
MA5-TRG-P-01	Applies Pythagoras' theorem and trigonometry to solve 3-dimensional problems and applies the sine, cosine and area rules to solve 2- dimensional problems, including bearings.
MA5-TRG-P-02	Establishes and applies the properties of trigonometric functions and finds solutions to trigonometric equations.
MA5-ARE-C-01	Solves problems involving the surface area of right prisms and practical problems involving the area of composite shapes and solids.
MA5-ARE-P-01	Applies knowledge of the surface area of right pyramids and cones, spheres and composite solids to solve problems.
MA5-VOL-C-01	Solves problems involving the volume of composite solids consisting of right prisms and cylinders.
MA5-VOL-P-01	Applies knowledge of the volume of right pyramids, cones and spheres to solve problems involving related composite solids.
MA5-GEO-C-01	Identifies and applies the properties of similar figures and scale drawings to solve problems.
MA5-GEO-P-01	Establishes conditions for congruent triangles and similar triangles and solves problems relating to properties of similar figures and plane shapes.
MA5-GEO-P-02	Constructs proofs involving congruent triangles and similar triangles and proves properties of plane shapes.
MA5-DAT-C-01	Compares and analyses datasets using summary statistics and graphical representations.
MA5-DAT-C-02	Displays and interprets datasets involving bivariate data.
MA5-DAT-P-01	Plans, conducts and reviews a statistical inquiry into a question of interest.
MA5-PRO-C-01	Solves problems involving probabilities in multistage chance experiments and simulations.
MA5-PRO-P-01	Solves problems involving Venn diagrams, 2-way tables and conditional probability.
MA5-FIN-C-01	Solves financial problems involving simple interest, earning money and spending money.
MA5-FIN-C-02	Solves financial problems involving compound interest and depreciation.
MA5-NLI-C-01	Identifies connections between algebraic and graphical representations of quadratic and exponential relationships in various contexts.
MA5-NLI-C-02	Identifies and compares features of parabolas and exponential curves in various contexts.
MA5-NLI-P-01	Interprets and compares non-linear relationships and their transformations, both algebraically and graphically.
MA5-MAG-C-01	Solves measurement problems by using scientific notation to represent numbers and rounding to a given number of significant figures.
MA5-POL-P-01	Defines, operates with and graphs polynomials and applies the factor and remainder theorems to solve problems.
MA5-LOG-P-01	Establishes and applies the laws of logarithms to solve problems.
MA5-FNC-P-01	Uses function notation to describe and graph functions of one variable and graphs inequalities in one and 2 variables.
MA5-CIR-P-01	Applies deductive reasoning to prove circle theorems and solve related problems.
MA5-NET-P-01	Solves problems involving the characteristics of graphs/networks, planar graphs and Eulerian trails and circuits.

Science Outcomes

SC5-4WS	Develops questions or hypotheses to be investigated scientifically.
SC5-5WS	Produces a plan to investigate identified questions, hypotheses or problems, individually and collaboratively.
SC5-6WS	Undertakes first-hand investigations to collect valid and reliable data and information, individually and collaboratively.
SC5-7WS	Processes, analyses and evaluates data from first-hand investigations and secondary sources to develop evidence-based arguments and conclusions.
SC5-8WS	Applies scientific understanding and critical thinking skills to suggest possible solutions to identified problems.
SC5-9WS	Presents science ideas and evidence for a particular purpose and to a specific audience, using appropriate scientific language, conventions and representations.
SC5-10PW	Applies models, theories and laws to explain situations involving energy, force and motion.
SC5-11PW	Explains how scientific understanding about energy conservation, transfers and transformations is applied in systems.
SC5-12ES	Describes changing ideas about the structure of the Earth and the universe to illustrate how models, theories and laws are refined over time by the scientific community.
SC5-13ES	Explains how scientific knowledge about global patterns of geological activity and interactions involving global systems can be used to inform decisions related to contemporary issues.
SC5-14LW	Analyses interactions between components and processes within biological systems.
SC5-15LW	Explains how biological understanding has advanced through scientific discoveries, technological developments and the needs of society.
SC5-16CW	Explains how models, theories and laws about matter have been refined as new scientific evidence becomes available.
SC5-17CW	Discusses the importance of chemical reactions in the production of a range of substances, and the influence of society on the development of new materials.
